Looking for your 'My Providers'? You can always access it from the left navigation or [go there now](#).

Take control: Get the most out of your search

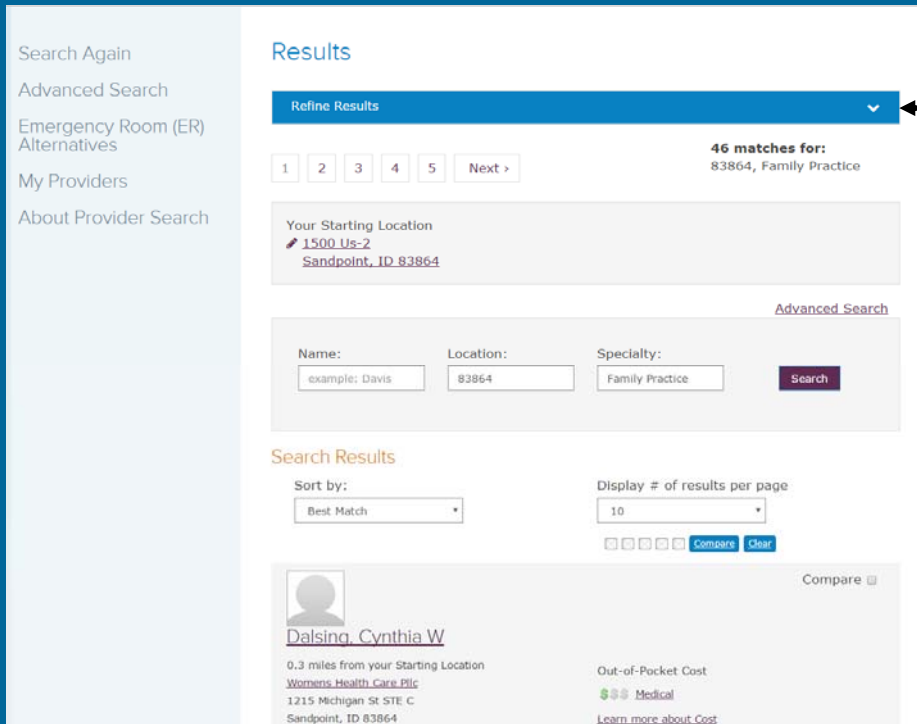

Our goal is to help you find the best doctor, hospital, clinic or other provider to match your needs. That's why we include in-network and out-of-network providers and show your coverage level for each choice.

No need to get bogged down reviewing hundreds of search results. Just use the Filter, Sort and Compare features to find your right match quickly and easily.

Location

Specialty (type of service)

Name of provider. This allows you to look up a specific provider, often helpful to see if a specific provider's status is in or out of network.

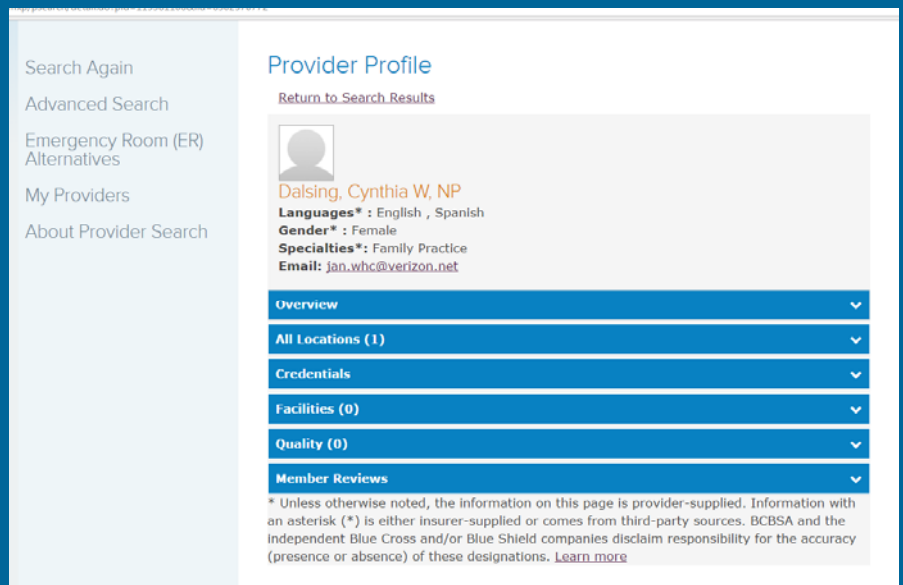

This will show you how many matches were found in the specified region under the requested specialty care.

Results should include:

- How far the provider is located from your specified address
- Address
- Price range (\$ to \$\$\$)

If you click on a specific provider, you will be taken to a profile page that offers:

- An Overview
- All locations for this provider (and a map)
- Credentials
- Facilities
- Any Quality or Member results or reviews

For more information or help creating an account or finding a provider, call Regence at: 1 855 857-9944
