Title	STAFF ENGINEER – SOLID WASTE
--------------	------------------------------

General Summary	<p><u>Summary:</u> The Staff Engineer will work closely with the Director of Solid Waste as directed. This position requires the ability to draw proficiently in AutoCad (Version 14 or higher), be proficient in mathematical calculations involved in the development and review of storm water management plans, including the design of culverts, transfer sites, research county rights of ways, assist in the development of various department grants, generate bid documents and manage construction projects and materials procurement, and assist the Planning Department as directed.</p> <p><u>Other Information:</u> Performs work that is regular and reoccurring with occasional variances from the norm that typically involves a moderate level of complexity. Incumbent typically works under specific and definite directions and well-known procedures. Work requires the exercise of normal self-direction as incumbent carries out instructions in oral, written or diagram format. Incumbent works under general direction with periodic supervision. Primary communication takes place with members of the department as well as regular communication with other departments, and to a lesser degree with members of the public. Definite impact of this position is due to the responsibility to ensure county is working within its defined rights of ways, and ensuring proper procedures are being followed in developing storm water management plans. Work is typically performed indoors in an office environment. Typically requires travel that takes place primarily within the County limits and sometimes requires extended visits to construction sites.</p>
------------------------	--
